

User Acceptance Testing (UAT) Template

Date	15 June 2026
Team ID	Pulkit Khera
Project Name	OnlineComplaintRegistration
Maximum Marks	

Project Overview:

Project Name: Online Complaint Registration Portal

Project Description: A web-based application designed to allow users to easily submit, track, and manage grievances, while automatically routing issues to the appropriate department for resolution.

Project Version: 1.0

Testing Period: 13.6.2026-15.6.2026

Testing Scope:

User registration and secure login system.

Complaint submission form with category selection.

Automated routing logic based on the selected complaint category.

User-facing status tracking dashboard.

As a user, I want to be able to submit a complaint so that my issue is officially recorded.

As a user, I want to see the status of my complaint (e.g., "Pending", "In Progress", "Resolved") so I know it is being handled.

As an admin, I want to view complaints sorted by department so I can assign them properly.

Testing

Environment:

URL/Location: Local hosting

Credentials (if required): none

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	[Positive] User successfully submits a new complaint	1. Log in. 2. Navigate to "New Complaint". 3. Fill in details and click submit.	System displays "Complaint Submitted Successfully" and generates a unique Ticket ID.	pass	pass
TC-002	[Negative] User tries to submit an incomplete form	1. Log in. 2. Leave "Description" field blank. 3. Click submit.	System prevents submission and highlights the missing field in red.	[pass]	pass
TC-003	[Positive] Ticket status correctly updates on the user dashboard	1. Admin logs in and changes TC-001 status to "In Progress". 2. User logs in and checks dashboard.	The status bar for the ticket changes from "Pending" to "In Progress".	[pass]	pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Form crashes when users upload large image files for evidence.	1. Open complaint form. 2. Attach a file larger than 5MB. 3. Click Submit.	High	Open	We need to implement a file size limit check on the frontend before form submission.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
