

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	15 June 2026
Team ID	Pulkit Khera
Project Name	OnlineComplaintRegistration
Maximum Marks	

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	2	High	Pulkit Khera
Sprint-1	Registration	USN-2	As a user, I will receive a visual confirmation message once my account is created in the database.	1	High	Pulkit Khera
Sprint-1	Login	USN-3	As a user, I can log into the application securely by entering my email & password.	2	High	Pulkit Khera
Sprint-2	Dashboard	USN-4	As a user, I can view a personalized dashboard displaying my past and current complaints.	3	High	Pulkit Khera
Sprint-2	Complaint Submission	USN-5	As a user, I can submit a new complaint by filling out a form with a title, description, and category.	3	High	Pulkit Khera
Sprint-3	Automated Routing	USN-6	As an admin, the system automatically routes incoming complaints to my department's view based on the category selected.	4	Medium	Pulkit Khera

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-3	Status Tracking	USN-7	As a user, I can see a status badge (Pending, In Progress, Resolved) next to my ticket.	2	Medium	Pulkit Khera

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
