

Project Design Phase-II

Data Flow Diagram & User Stories

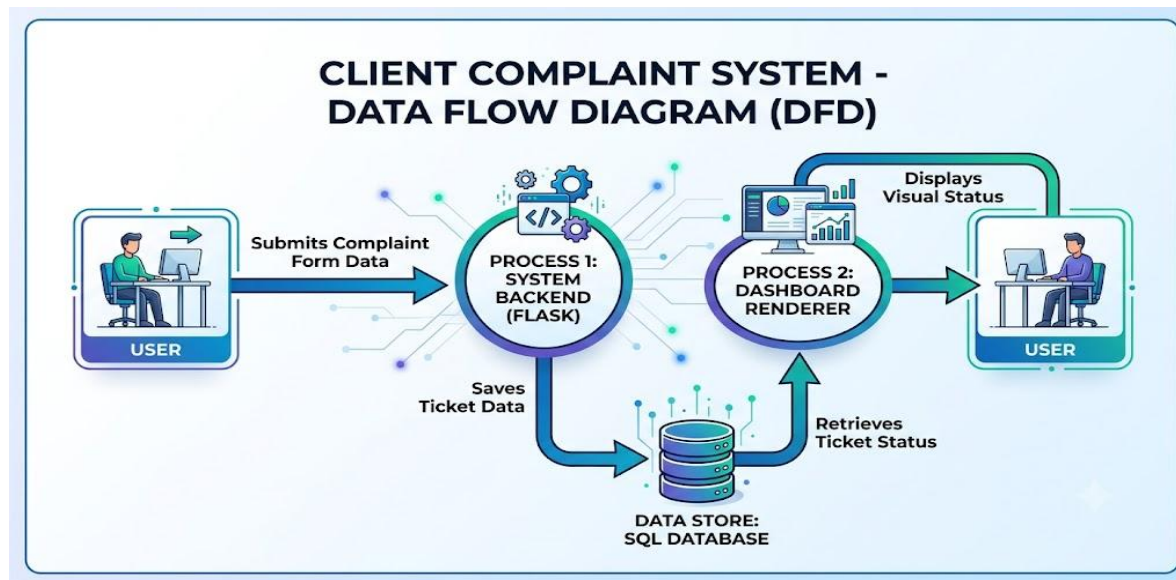

Date	15 June 2026
Team ID	Pulkit Khera
Project Name	OnlineComplaintRegistration
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

User Stories

Use the below template to list all the user stories for the product:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Web user)	Registration & Login	USN-1	As a web user, I can register and log in to the portal securely.	I can access my personalized dashboard upon successful login.	High	Sprint-1
Customer (Web user)	Complaint Submission	USN-2	As a web user, I can submit a grievance with a title, category, and description.	A unique Ticket ID is generated and saved to the database.	High	Sprint-2
Customer (Web user)	Status Tracking	USN-3	As a web user, I can view a list of my submitted complaints and their current status.	Dashboard displays accurate statuses (Pending, Resolved) from the database.	High	Sprint-2
Administrator	Ticket Management	USN-4	As an admin, I can view all submitted complaints across the system.	Admin dashboard loads a table of all user tickets.	Medium	Sprint-3
Administrator	Status Update	USN-5	As an admin, I can update the status of a specific complaint to "Resolved".	The database updates, and the user sees the new status.	Medium	Sprint-3
