

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	15 June 2026
Team ID	Pulkit Khera
Project Name	OnlineComplaintRegistration
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Authentication	- Secure Registration via web form
		- Secure Login/Logout workflows
FR-2	Complaint Management	- Create a new complaint ticket
		- View history of past complaints
FR-3	Automated Routing	- Assign tickets to specific departments based on the dropdown category selected
FR-4	Administrator Controls	- View centralized list of all system tickets
		- Modify the status of a ticket
FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Authentication	- Secure Registration via web form
		- Secure Login/Logout workflows

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The user interface must be clean, intuitive, and responsive on both desktop and mobile browsers.
NFR-2	Security	Passwords must be hashed before storage in the database. Active sessions must be required to view private complaint data.
NFR-3	Reliability	The system must successfully log every submitted complaint into the database without data loss.
NFR-4	Performance	Web pages and dashboards should render and load in under 2 seconds for a seamless user experience.
NFR-5	Availability	The application should be available 24/7 with minimal downtime once deployed to a production environment.
NFR-6	Scalability	The backend routing and database structure must be able to handle an increasing number of concurrent users and ticket submissions.
